

# What went well

# What to improve

Time  
management

Project  
updates

Some issues  
took longer  
than  
expected

Lack of  
technical  
knowledge

Not that  
good quality  
production

**Failure**

# Actions for improvement

Do smaller tasks more frequently instead of leaving it all for the last weekend

Every time after finishing or doing some tasks, report the results to the group

Gain more technical knowledge by doing researches, team meetings and just by trying to execute simple tasks

For better quality, our team needs not to rush through tasks just to complete them

## Action

When evaluating issues and giving them story points do not underestimate simple looking tasks especially if it involves database
